

NEW CPD course:

Advanced dental radiology diagnostics – tips on how to structure a written radiology report

FRIDAY 31 MAY 2019

This course provides dental practitioners with the skills to integrate 2D and 3D dental radiology diagnosis in their daily practice and construct a radiology report

Friday
31 May

Amora
Hotel

8.0 CPD
hours

\$770

Course objectives

- Develop a systematic approach to interrogation of OPGs and CBCT scans
- Interpret plain film and CBCT images
- Recognise common pathology of the jaws
- Recognize sinus and TMJ pathology
- Identify soft tissue calcifications
- Learn how to structure a radiology report

Course schedule

A full day of lectures and clinical exercises
(8.0 CPD)

Morning session

Theory and practice of dental imaging

- The OPG – a stepwise approach to viewing and recognising pathology
- 3D image analysis: introduction on opening and navigating CBCT datasets
- Radiology diagnosis –the teeth, the jaws and beyond. Overview of pathology as it appears in dental radiographs

Afternoon Session

Advanced diagnostics

- CBCT – steps in interrogating a CBCT dataset
- Diagnostic considerations for cone beam CTs
- Examples and practical exercises
